# DIGIBET

««««World's First Decentralized Betting Platform»»»»

## Vision

The global sports betting market is poised to grow by USD 134.06 billion during 2020-2024, progressing at a CAGR of almost 10% during the forecast period. With digital revolution transforming the world every second, the sports betting market is likely to grow dynamically in the future. This market currently holds around 70% of the global gambling revenue, which is more than any other sectors inclusive of lotteries, casinos, and poker, among other forms of gambling.

On the other hand, E-sports is rapidly growing industry, with the global eSports market valued at just over 1.08 billion U.S. dollars. Whilst there are plenty of potential to explore, together there are also challenges to overcome.

The COVID-19 pandemic has jump-started a period of growth for the esports betting industry, and companies in the space are working to address the unique challenges that come with this relatively new way to gamble.

## What is Digibet

Digibet is the world's first decentralized betting platform created for Sports & E-Sports events.

Our Vision is to create a decentralized community-driven peer-to-peer pool betting platform where players can use Digibet token for betting on the result of a match/game to earn more tokens.

10% of total pool of every event will be charged as tax, out of which 5% will be burned and remaining 5% will be used for Marketing.

## How Digibet is a solution to market problems

With the current centralized betting model, there is an intermediary party (bookmaker) involved. Betting is always done between players and bookmaker so bookmaker can involve in cheating activities like match fixing to officiate a match with the intention of achieving a pre-determined result, violating the rules of the game and often the law.

Also, there is a risk of gambling fraud and theft with the current centralized model of sport/e-sport betting, as the bookmaker can leak personal information of player or run away with funds.

With the help of smart contract Digibet facilitate a decentralized P2P betting platform, where players can connect their private wallets to the Digibet web-app and bet on a team by calling a deposit smart contract.

This will create a pool of Digibet tokens and upon completion of match/game all the pooled tokens (after tax deduction) will be automatically distributed among the winners based on the amount of initial deposit tokens.

In a nutshell Digibet provides a decentralized P2P betting platform without any intermediary party which prevents all sort of fraudulent activities and preserve anonymity of players.
